Service Description	Hourly Rate
<p>Network Project Management: Project Management services complement the full life cycle support of a network operation. Proven methodologies are utilized that result in comprehensive and effective project management. This service augments your staff with dedicated project managers who have both the management and technology expertise to deliver network services and technology solutions spanning, Internetworking, Security, Optical Internet, SAN, Convergence, and Operations Management Solutions. Program office/management covers concurrent, multiple service delivery efforts, including projects and ongoing project-related activities. This service includes administration and management of program office personnel, project plan and deliverable review and evaluation, resource scheduling and coordination, variance analysis and reporting, status reporting, and client relationship building and support. Project management is a single service delivery effort that includes strategy development, planning and project monitoring, resource coordination, status reporting, ongoing risk assessment, and project reporting.</p>	
Project Manager	\$226
<p>Network Assessment: The network assessment provides the client with vital information about the network infrastructure. Discovery and review includes, but is not limited to, LAN & WAN design (physical and logical topology), technology, documentation, intranet, equipment, application and routing protocols. Management reporting on observations and recommendations is provided as part of the network assessment.</p>
