

DATA MIGRATION

Minimizing Risk, Maximizing ROI

Updating hardware or consolidating data centers requires data migration – and inherent risk. This process places demands on staff, infrastructure and systems. It could cause technical incompatibilities and potential data corruption or loss. And, if attempted without expertise, it could result in substantial costs. However, when executed in the right way, at the right time, by the right experts, data migration can be a seamless project that delivers significant cost and space savings.

Ensure Migration Success with ViON®

ViON has guided government and commercial organizations through the migration process for over 37 years. We can safely and securely move data in any environment, from large companies and institutions to public agencies with 24x7 mission-critical environments and strict security requirements. Using a proven process and world-class methodologies, ViON works with each customer to develop a customized comprehensive migration strategy based on their particular environment and recommends the best approach to maximize your IT investment. We do this by:

- ▶ Determining technical, mission-critical and operational requirements
- ▶ Identifying appropriate cloud candidates
- ▶ Assessing the current infrastructure, systems and applications
- ▶ Defining compliance requirements for targeted system(s)
- ▶ Identifying necessary conversion activities for cloud compatibility

Our migration plans are designed to seamlessly move data while keeping servers online and applications running so your internal team can stay focused on your core business with minimal disruption.

The ViON Experience

Experience, Expertise, Solutions

- ▶ Decades serving government and commercial customers
- ▶ Over 37 years of data center infrastructure expertise
- ▶ Strategic OEM partnerships to offer the best technology in the market
- ▶ Industry certified and cleared engineers
- ▶ 24 X 7 support center, 100% cleared, 100% U.S.-Based
- ▶ Veteran-owned, privately held company

ViON's Comprehensive Data Migration Solutions

ViON's range of data migration solutions enables organizations to mitigate risk and minimize work disruption, even for the most complex projects.

Open Systems Block and NAS

- ▶ Get quick and reliable data migration for block and/or NAS data in a phased approach to ensure a successful migration that maintains data availability requirements.

Mainframe

- ▶ Move individual disk volumes or an entire DASD controller to a new ViON solution during normal system operations, without interrupting system activity. ViON can also swap DASD on all sharing systems simultaneously and change device geometries on the fly.

Cloud

- ▶ Migrate complex and demanding applications to the Cloud. Our team has extensive experience migrating many of the most widely-used, business-critical applications on the market. ViON cloud migration services provide guidance on how organizations can adjust IT processes and compliance procedures to ensure effectiveness when applied to cloud infrastructure and applications.

Centera

- ▶ Enable fast and accurate data migrations from the EMC Centera to new storage platforms, regardless of previous source input data formatting.

Fibre Switch

- ▶ Refresh and consolidate the old and/or existing Fibre Channel Switching infrastructure, minimizing disruption to your business.

ViON has the experience, the expertise and the solutions required to efficiently and effectively migrate your cloud data while protecting the security of your information, maintaining your budget and minimizing disruptions to your revenue-building activities.

For more information, please contact our sales team at **571.353.6000** or visit www.vion.com/it-infrastructure.

Host-based Migration uses both file copy and host-based replication (i.e., operating system mirroring, Veritas Volume Manager)

Storage System Remote Replication-based Migration (i.e., EMC Symmetrix Remote Data Facility, Hitachi TrueCopy synchronous/asynchronous/Extended Distance software)

Storage Virtualization-based Migration (i.e., EMC Invista, IBM SAN Volume Controller, Hitachi Basic Operating System V, Storage Manager Software)

About ViON

Designing and implementing innovative solutions that meet dramatically changing IT requirements is ViON's mission. With over 37 years experience, we've grown from a small product reseller into a leading systems integrator. We focus on data management, so you can focus on your organization's success. We're on the leading edge of Cyber and Advanced Analytics, Cloud, Storage and XaaS.
