

# ViON Capabilities

**ViON®, a Cloud Service Provider, delivers a complete portfolio of solutions for cloud, advanced analytics and data center infrastructure – all available in a flexible as-a-Service model.**

ViON's team of experts brings more than 37 years of experience in government and enterprise IT systems. We help organizations identify the technology that aligns with their needs, both current and future, as well as plan and integrate new systems into existing IT environments – all deployed seamlessly.

## THE NEXT GENERATION DATA CENTER

ViON delivers solutions that help customers maximize the value of their data. We take the time to fully understand our customer's operations—their organization's requirements and objectives. We consider all your data needs and assess how you need to integrate, analyze and manage that data while evaluating the latest technology to fit your current and future requirements. ViON offers professional, managed and support services at every step.

### IT INFRASTRUCTURE

ViON's IT infrastructure solutions are available via direct purchase or an IaaS model. We partner with industry leading OEMs and train your technical team accordingly. ViON has been delivering enterprise-ready Storage, Flash, Data Protection, Archive, Virtualization and Hyperconverged and Converged Infrastructure to enterprise public and commercial organizations for decades. This extensive experience enables us to advise organizations on the best solution for each specific use case with our Data Center as-a-Service program.

## **CLOUD/DATA CENTER AS-A-SERVICE**

Because ViON's solutions and infrastructure are available as-a-Service, organizations can flexibly provision and manage IT resources to meet real time needs - with no minimums, ceilings or penalties for deactivation. Our experts help ease the transition to Cloud, guiding teams through the process from assessment to deployment, ensuring goals are met.

## **ADVANCED ANALYTICS**

ViON's DataAdapt platform delivers flexibility and performance to enable more informed data-driven decisions. ViON's flexible procurement model allows clients to choose from an appliance or an as-a-Service implementation. It is designed to secure and scale all data and analytics and support the development and production workflows in a single platform.

## **ViON MARKETPLACE™**

The ViON MarketPlace accelerates the next generation data center by enabling IT managers to shop, compare, procure and manage IT infrastructure. A cloud services platform, the ViON MarketPlace includes one of the largest portfolios of data center technologies priced as-a-Service. It provides greater control and oversight of requirements, procurement, workflows, contracts and key performance indicators. The ViON MarketPlace is hosted by ViON for use by authorized customers, OEMs and resellers creating new ways to deliver technology to market.

## **OUR TEAM**

Known for our engineering expertise and exacting standards, ViON ensures that only those with the highest level of training, experience and industry certifications design, install and support our breadth of solutions. ViON helps enterprise organizations achieve greater success. A Veteran-owned business, headquartered in Herndon, VA, ViON helps you do more with IT.
