

About ViON

Designing and implementing innovative solutions that meet dramatically changing IT requirements is ViON's mission. Founded in 1980, we've grown from a small product reseller into a leading Cloud Service Provider delivering customized solutions and best of breed offerings from the world's premier OEMs to large public and private organizations in a single marketplace.

Known for our engineering expertise and exacting standards, ViON ensures that only those with the highest level of training, experience and industry certifications design, install, maintain and support our breadth of solutions.

We focus on data management, so you can focus on your organization's success.

We're on the leading edge of Advanced Analytics, Cloud and Data Management. ViON's cloud-based "as-a-Service" platform, ViON MarketPlace™, delivers direct access to the technology you need to modernize your data center.

ViON's passion for innovative solutions simplifies the complexity of digital transformation. Learn more at www.ViON.com.

Committed to Innovation

ViON® is committed to innovation – and to the success of your organization. We work with the leading industry OEM partners to implement technologies to meet your mission success. ViON offers custom solutions and IT infrastructure for direct purchase or in an as-a-Service model. ViON's Customer Intimacy Model ensures that our collective team of experienced sales and professional service teams are intimately involved with your organization to ensure your success.

Our Solutions

Cloud and Data Center as-a-Service (DCaaS)

ViON provides enterprise-class Public, Hybrid and Private Cloud solutions, backed by IT infrastructure experts and best-in-class infrastructure from the world's premier OEMs, using our flexible consumption-based financial model. Our custom cloud solutions deliver high performance levels equal to or better than our clients' own data centers, with a lower total cost of ownership than major cloud providers. ViON's Data Center as-a-Service removes the complexities and reduces the burden of managing data center migrations and consolidations by providing all facets of data center technology as-a-Service without the up-front investment. DCaaS helps accelerate and streamline delivery of capabilities and technology, enable modern IT delivery and reduce costs – all with the support of our expert project management team 24/7/365.

Advanced Analytics

ViON's Big Data and Cyber Analytics offerings, including our **DataAdapt Platform**, are designed to meet specific requirements based upon our customers' applications. With integrated compute, storage, network and software components, our DataAdapt Platform provides foundational business intelligence, data warehousing, analytics and presentation capabilities so you can derive value from your data faster than ever.

Data Management & Protection

In addition to our back-up and recovery, active archive, continuous operations, retention and compliance expertise, ViON offers several scalable, agile and efficient solutions that help manage the exponential growth of unstructured data and preserve, manage and protect data for longer periods of time to meet compliance, e-discovery and Big Data analytics requirements.

Customer Support

ViON employs experienced and certified Solution Delivery Consultants, along with Project Managers, to oversee complex IT deployments.

We have various support and consumption models to meet your individual needs:

- On-Site Field Engineering – Our experts support your operation from your location.
- Secure Support Center – 24/7/365 dedicated priority response hot line for immediate critical issue response.
- US-Based Support Team – Our team comes to you to resolve issues and provide advice.

ViON MarketPlace™

The ViON MarketPlace accelerates the next generation data center by enabling IT managers to shop, compare, procure and manage IT infrastructure. A cloud services platform, the ViON MarketPlace includes one of the largest portfolios of data center technologies priced as-a-Service. It provides greater control and oversight of requirements, procurement, workflows, contracts and key performance indicators. The ViON Marketplace is hosted by ViON for use by authorized customers, OEMs and resellers creating new ways to deliver technology to market in a single platform.

Professional Services

ViON's Professional Services range from assessments that review your infrastructure performance and requirements, to bandwidth and data analysis to help you avoid risks and pitfalls. ViON's Professional Services team is comprised of experienced consultants with technical expertise in integrating and onboarding your IT solutions, either on premise or in a hybrid or public cloud scenario. ViON Service Packs and Residency Services provide short-term and long-term engagements with technology experts to augment your teams.

Managed Services

ViON provides Managed Services that incorporate the industry's best people, products, tools and methodologies to maximize the return on your IT investments. Our Managed Services team helps you improve operational efficiency and increase utilization and performance of your solutions. We also fill critical staff and skill set gaps to help you attain Service Level Objectives (SLOs) in a cost effective manner.
