

Oracle as-a-Service: 5 Key Facts

ViON®'s unique Oracle as-a-Service solution manages exponential data growth with the latest Oracle hardware and software technology, lowers total cost of ownership (TCO) and accelerates a Cloud migration strategy.

- 1 Streamline and modernize IT hardware and software with Oracle Infrastructure-as-a-Service**
 - Experience Oracle Database 12c Release 2 (12cR2), SPARC SuperCluster & Exadata, including the SPARC portfolio of cloud services, engineered systems and servers
 - Transition to public, hybrid or private cloud with an integrated system containing embedded security features, including S-7 Chip technology for private cloud
 - Ensure real-time data analysis with a robust database system purpose-built for structured and unstructured data management
- 2 Secure critical data and applications with SPARC-based servers to optimize performance, improve efficiency and maintain the highest security**
 - Maintain full security for classified data and environments
 - Monitor and adjust usage needs in real-time via an intuitive, easy-to-use portal
 - Maximize security – no shared resources or access to your private data or network
- 3 Expand capacity and technical capabilities, streamline management and leverage OpEx funding through our as-a-Service model**
 - Break free of costly and time-consuming traditional procurement models
 - Pay only for the IT capacity and services consumed
 - Rapidly onboard the latest IT infrastructure to adapt to organizational change
- 4 Optimize and extend a private cloud environment on- or off-premises**
 - Deploy a purpose-built, integrated infrastructure system to accelerate transition to public, hybrid or private cloud models with Private Cloud Appliance (PCA)
 - Reduce complexity with ViON's Cloud experts and seasoned engineers
 - Ease transition, eliminating the need to re-write or re-architect legacy applications
- 5 Leverage experienced Oracle and ViON expertise for mission-critical demands**
 - Access highly-skilled IT professionals to deploy and implement customized solutions
 - Seamlessly integrate compute, storage and networking with Oracle software
 - Rely on ViON's Cloud architects, Professional and Managed Services teams 24/7/365
