

# ViON Private Cloud: 5 Key Facts

ViON's Agile Cloud Platform using as-a-Service enables fast delivery of enterprise-class private Cloud for agencies that need to directly maintain their infrastructure and data, in an OpEx model.

1

## ViON Agile Cloud Platform expedites enterprise-class private Cloud

- ▶ Purpose-built, integrated infrastructure streamlines deployment
- ▶ Cloud experts and seasoned engineers eliminate complexity
- ▶ No need to re-write or re-architect legacy applications

2

## ViON Agile Cloud Platform empowers security and control

- ▶ Ensures security for classified data and environments
- ▶ Easy-to-use portal to monitor and adjust usage needs in real-time
- ▶ Private means private: No shared resources or access to your data or network

3

## ViON Agile Cloud Platform lowers costs

- ▶ Break free of costly and time-consuming traditional procurement models
- ▶ Pay only for the IT capacity and services consumed
- ▶ Use OpEx to access leading edge IT from premier manufacturers like Hitachi Data Systems, EMC, NetApp and more

4

## ViON Agile Cloud Platform rapidly expands capabilities

- ▶ Scale storage and compute up or down as needed
- ▶ Easily onboard new IT capabilities to meet mission demand
- ▶ Keep pace with rapidly evolving technologies

5

## ViON Agile Cloud Platform frees resources for mission-critical demands

- ▶ Access highly-skilled IT workforce
- ▶ Align compute, storage and networking directly with IT demands
- ▶ Leverage ViON's Cloud architects, Professional and Managed Services and 24/7/365 Support
