

ViON Enterprise Cloud™:

5 Key Facts

ViON Enterprise Cloud™ (VEC) is a hybrid, multi-cloud management solution that offers organizations complete control over deployment, management, billing and governance of their cloud environments. VEC combines Operations, Service and Business Management functions into a single interface – across Private, Public and Hybrid clouds.

- 1 Consolidate Multi-Cloud and Hypervisor Management with a Single Interface**
 - Manage any public, private and hybrid cloud in a single pane of glass
 - Seamlessly integrate with public cloud providers, ViON as-a-Service solutions, hyperconverged platforms and legacy data center infrastructure
 - Expand or migrate workloads between cloud environments efficiently via policies
- 2 Provide Visibility and Control with End-to-End Governance for Order Management**
 - Reduce “shadow IT” with on-demand, self-service ordering
 - Easily monitor and manage show backs/charge backs and usage across your organization’s structure
 - Derive deeper insights from data delivered via detailed reporting dashboard
- 3 Accelerate New Order Processing with a Self-Service IT Platform**
 - Empower users to procure what they need, as they need it by offering a “public cloud-like” catalog
 - Increase efficiency and visibility with online ordering and billing of infrastructure
 - Manage user access by integrating with role-based lists and policies
- 4 Decrease Deployment Times for IT Environments**
 - Deploy systems, applications and environments in minutes with end-to-end automation
 - Service lifecycle management allows for quick insight into provisioned environmental health, and what versions are in use
 - Script out custom configurations based on company’s evolving needs
- 5 Streamline Asset and Change Management**
 - Manage assets and capacity, and review system changes, with ITIL-based service delivery
 - SLA Dashboard for problem/incident management and 24x7 support and maintenance
 - Gain insights and ensure compliance via customized order and change reports
