

Accelerating IT Modernization

ViON® helps organizations and government agencies acquire new technology quickly and affordably, providing a flexible as-a-Service model, along with professional and support services to meet our customers' evolving needs. We deliver partnerships with industry-leading manufacturers that, like ViON, have a passion for solving the most complex enterprise IT challenges — because relationships have been our foundation for nearly 40 years and driving successful customer outcomes is at the heart of all we do.

Our Services

ViON Enterprise Cloud™

ViON Enterprise Cloud (VEC) delivers a hybrid, multi-cloud solution that can be managed through a single interface – bringing the public cloud experience to the private cloud environment. At its core, VEC manages multi-cloud solutions to meet the demands of our customers – whether Private, Hybrid or Public implementation of IaaS or PaaS – via ViON's Multi-Cloud Orchestration (VMCO), which gives them total control over deployment, management, tracking and governance of their cloud enterprise solutions.

Infrastructure as-a-Service (IaaS)

ViON's Infrastructure as-a-Service (IaaS) provides all facets of data center technology in an as-a-Service model, including storage, compute, network and hyperconverged infrastructure as well as capabilities like data management, data protection, back-up, recovery, archiving and data analytics without the up-front investment. We tailor our services to our customers' needs, ranging from a fully managed service to 24/7/365 support services or anywhere in-between.

Artificial Intelligence (AI)

ViON has the advanced expertise, partnerships and tools required to deliver an AI infrastructure that meets our customers' needs in an as-a-Service acquisition model. Our data scientists possess unparalleled data analytics expertise and we are part of a robust partner community that is helping organizations accelerate their AI practice and gain insights into their data.

Advanced Analytics

ViON's Advanced Analytics offerings, delivered via our validated, tested and ready-to-deploy DataAdapt Platform, accelerate the speed-to-value of big data analytics with a converged, pre-configured hardware and software stack that can be deployed as a solution or as-a-Service.

IT Infrastructure

ViON offers an array of infrastructure solutions to support enterprise environments. From hyperconverged infrastructure (HCI) and flash storage arrays to software defined storage and object storage, ViON offers options for direct purchase or as-a-Service delivery models with Professional, Managed and Support Services to ensure our customers get the solution that meets their exact requirements.

Professional, Managed & Support Services

- **Professional Services** – ViON's Professional Services range from infrastructure performance assessments to bandwidth and data analysis.
- **Managed Services** – ViON's Managed Services incorporate the industry's best people, products, tools and methodologies to maximize the return on our customers' IT investments.
- **Support Services** – ViON employs experienced and certified Solution Delivery Consultants, along with Project Managers, to oversee complex IT deployments.

ViON MarketPlace™

ViON MarketPlace enables IT managers to shop, compare, procure and manage IT infrastructure delivered as-a-Service. A cloud services platform, the ViON MarketPlace includes one of the largest portfolios of data center technologies priced as-a-Service. It provides greater control and oversight of requirements, procurement, workflows, contracts and key performance indicators. The platform is hosted by ViON for use by authorized customers, OEMs and resellers - creating new ways to deliver technology to market.

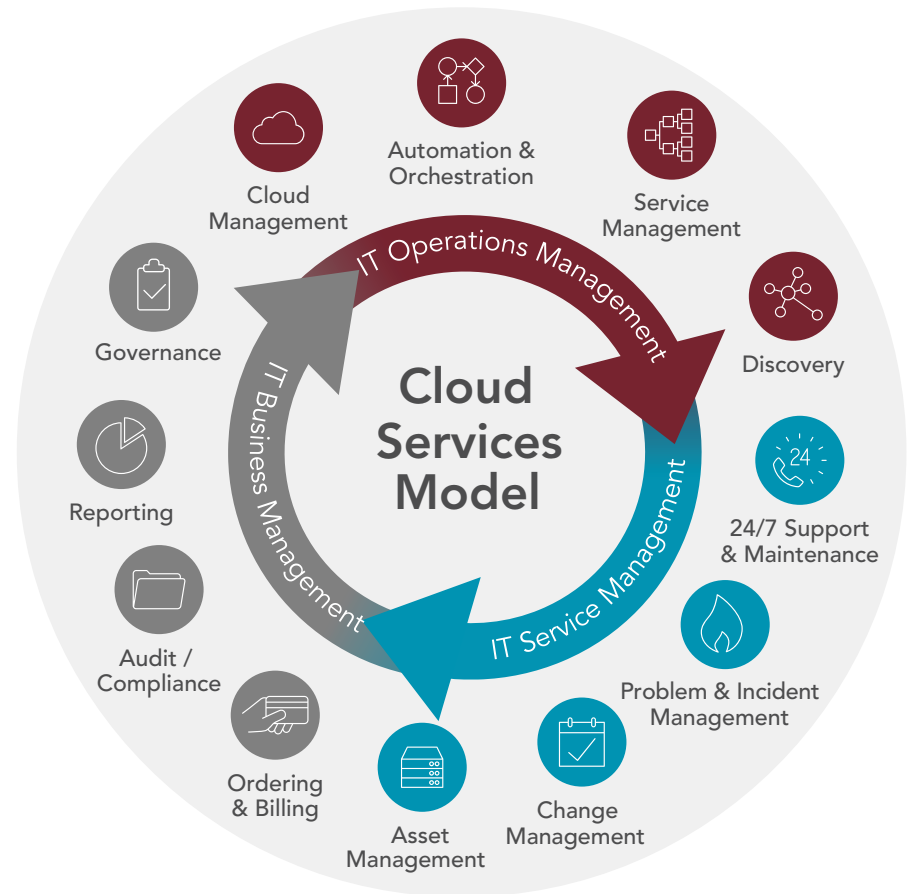

Engineering Expertise

ViON engineers receive the highest level of training and industry-standard certifications including:

- Industry professional certifications
- 25+ years providing support and customer services
- 30+ years' experience designing and implementing solutions
- 30+ years providing enterprise solutions, products and services
- Fully cleared engineering team to support DoD & Intel customers
- Full scope polygraph clearances DOE Q/L

About ViON Corporation

ViON Corporation is a cloud service provider with over 40 years' experience designing and delivering enterprise data center solutions for government agencies and commercial businesses. The company provides a large portfolio of IT as-a-Service, including infrastructure, multi-cloud and artificial intelligence (AI) solutions. Focused on supporting the customer's IT modernization requirements, ViON's Enterprise Cloud is changing cloud management for the market, providing a streamlined platform to audit and control technology in an evolving multi-cloud world. The ViON Marketplace™ allows customers to research, compare, procure and manage a full range of everything as-a-Service solutions from leading manufacturers via a single portal. ViON delivers an outstanding customer experience at every step with professional and managed services, backed by highly-trained, cleared resources. A veteran-owned company based in Herndon, Virginia, the company has field offices throughout the U.S. (vion.com).
